Trans. of Khim[icheskiy] Volok[na] (USSR) 1960, no. 1, p. 23-26.

A technological comparative study was made of various viscose celluloses with higher content of α-cellulose. During the process of pre-ripening in these celluloses different amounts of β-cellulose are formed. An inverse proportionality is stated between the tenacity and extension of the viscose fibre and the β-cellulose content in the pre-ripened alkali cellulose. (Author)
